This application contains claims directed to the following patentably distinct species:

First species of Figures 1-8 (specification, page 12, line 21 – page 38, line 17),

Second species of Figures 9-12 (specification page 38, line 18 – page 42, line 16),

Third species of Figure 13 (page 42, lines 17-36) and

An in-determinant number of un-illustrated species (variants of the above) described on page 43, line 1 – page 45, line 5.

In the event one of the in-determinant number of un-illustrated species described on page 43, line 1 – page 45, line 5, is elected, applicant is required to provide a proposed drawing correction clearly illustrating it in response to this office action.

The species are independent or distinct because they disclose mutually exclusive features and structures that are burdensome to search out in the limited time allotted for examination.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, the examiner is unsure if any claims are generic.

Art Unit: 3753

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
